PRECISE RACING CHAIR STICKERS

While some people prefer the sleek look of the Black T-bar as we ship it, others like the look of the bold Precise Racing Chair logo on their components. The choice is yours. Should you decide to apply these labels, here are some suggestions.

Suggested assembly instructions:

1. Place the Black T-Bar assembly on a table or other surface with Red handle facing down.
2. remove the backing from the label
3. apply the label to the side of the square tube, about 2" from the round tube.
4. do the same on the other side

Of course, you can use your creativity and apply these labels wherever you would like to. The labels will not adhere to the Precise Racing Chair very well and it recommended that you **DO NOT** apply labels onto the chair. You won't hurt the chair if you apply the label to it, but the label is likely to fall off in a short period of time. The plastic portion of the Chair is a very non-stick surface – good for keeping it clean, not so good for applying a label.
